

FACILITYMANAGER FOR FIRE

FacilityManager for Fire is a software system designed to schedule, track and document inspection and maintenance activities on fire & life safety equipment. Packaged with Pocket PCs, FacilityManager for Fire ensures data integrity by eliminating paper forms or logsheets, while providing proof of compliance with OSHA, NFPA, The Joint Commission and other regulatory agencies.

STREAMLINES FIRE EQUIPMENT INSPECTIONS

FacilityManager for Fire allows a technician to record detailed information about inspections on any type of equipment. The Pocket PC records the technician's response along with the date and time of each entry. FacilityManager for Fire features include:

- ▶ Flexible interval scheduling allows the system to prompt an activity at virtually any interval including daily, weekly, monthly, annually, or hourly.
- ▶ Directs the Technician to the equipment requiring inspection or maintenance.
- ▶ Prompts the Technician through the tasks required to complete the inspection by asking a series of user created questions about the specific piece of equipment.
- ▶ Generates discrepancies for failed inspections or responses outside of acceptable parameters.
- ▶ Provides the option to automatically generate a work order for failed inspections.
- ▶ Allows for directed or self-directed routes (roam) routes.
- ▶ Provides an audit trail for warranty and liability tracking.
- ▶ Verifies that maintenance activities have been completed.
- ▶ Generates scheduled or unscheduled work orders on the PC or Pocket PC during field use.

REPORTS

The power of FacilityManager for Fire resides in its ability to organize your data into meaningful reports. The reports give you control of your data in a convenient, organized manner.

- ▶ History Report
- ▶ Tour Report
- ▶ Incident Report & Discrepancy
- ▶ Multiple Work Order Reports
- ▶ Task Status Report
- ▶ Metered Usage Report
- ▶ Equipment Warranty Status
- ▶ Equipment Failure Rates & General Condition
- ▶ List Reports
- ▶ Missed Inspections

OTHER NOTABLE FEATURES

- ▶ User-defined fields labels that allow for customization of the program using your own terminology.
- ▶ Customize reports with company logo.
- ▶ A Scheduling Calendar displays work orders on a color-coded calendar.
- ▶ Ability to perform searches or filtering in tables for ease in locating records.
- ▶ Powerful filtering utility to ease record locating.
- ▶ Technician records allow you to store detailed information on employees, such as work schedule & certifications.
- ▶ Provides a data transfer feature that allows for exporting of data in several different formats including XML, comma or tab-delimited text.
- ▶ MicroSoft SQL Server Desktop Engine (MSDE) is used for standalone configurations.
- ▶ Certified database options for Enterprise configurations are SQL and Oracle.
- ▶ The Pocket PC is supported by Microsoft .NET and uses SQLCE.
- ▶ Enterprise Sync Service allows concurrent syncing of multiple devices via USB cable, 802.11 WAN, ethernet, wireless data.
- ▶ Incident based email notification
