

## APPLICATION REPORT

# MIAMI VALLEY HOSPITAL

DAYTON, OHIO

### QUOTE:

*"When the Joint Commission came around for inspections, there were 11 extinguishers that they pulled to question us about. We printed our computer file and immediately highlighted the 11 in question. JCAHO was impressed with our detailed list. This was one of the many areas surveyed that resulted in four consecutive certificates from them denoting compliance 'With Accommodations', the highest JCAHO rating available."*

**-Duane Swank**, Miami Valley Hospital  
Maintenance Manager

TISCOR'S FIRE AND SAFETY SOFTWARE IS USED WITH  
SYMBOL TECHNOLOGIES' SCANNER AT MIAMI VALLEY  
HOSPITAL FOR FIRE EXTINGUISHER INSPECTIONS.

### PROFILE:

- ▶ 5,000 Employees
- ▶ 45 Maintenance Employees
- ▶ 1,000 Fire Extinguishers
- ▶ 1.8 Million Square Feet
- ▶ TISCOR Customer since 1994

### PRODUCT BENEFITS:

- ▶ TISCOR's system allowed the maintenance department at Miami Valley Hospital to eliminate paperwork associated with fire extinguisher inspections. Each month, an electronic list is automatically generated showing those extinguishers that are due for testing.
- ▶ In just minutes, all of the date and time stamp information retrieved from the hand-held scanners is easily uploaded to the hospital's desktop computer. Internal and external reports are printed out on a moment's notice.
- ▶ Miami Valley Hospital employees (everyone from clerical to management) no longer spend weeks compiling and finalizing JCAHO reports. With TISCOR's system, all of the work is completed by one person in three to four days and there's no need for manual data entry.

- ▶ During regular emergency drills, extinguishers are often misplaced. The system makes it easy for Miami Valley Hospital to identify the appropriate location of misplaced extinguishers.
- ▶ Miami Valley Hospital is pleased with the product upgrades and TISCOR'S continuous customer support throughout the years. The facility is currently considering expanding its extinguisher software system to integrate door, sprinkler, fire pump and other life safety device checks.
