

Product Certifications – TRACK PAK 5.0

Brady/TISCOR certifies that the software contained in this release package has been developed and thoroughly tested to meet industry standards using the best possible software development and quality assurance procedures. All project requirements have been successfully implemented, all Quality Assurance test documentation has been completed, all significant bugs have been addressed, and all open issues have been identified and documented.

Brady/TISCOR product certification is not an endorsement of the product, proof of a product's quality, or an indication of the product's robustness. Brady/TISCOR certification means that all Software Quality Assurance procedures were conducted on the product. There is the possibility that a product may pass Brady/TISCOR certification tests but not meet a customer's specific needs. Before purchasing any Brady/TISCOR product, customers should thoroughly review the product for defects and to verify that the required functionality is present.

NOTE: TISCOR products are Windows® based. They do not operate on MAC operating systems.
