

PROTRAC SECURITY

PROTRAC Security is a basic guard tour management system that documents all security checkpoints visited. The date, time and location of each checkpoint are recorded simply by scanning a bar code and all incidents encountered are logged instantly.

Easy To Set-up

TISCOR's guard tour system is set-up in an easy-to-use and easy-to-understand format. Officer information and all security checkpoints are easily and quickly entered into your computer database.

Easy To Use

Durable bar codes are placed at each location requiring inspection. Officers record their activities at a specific site by scanning the bar code at the location. Incidents are easily documented through the use of small incidents cards.

Instant Report Generation

At the conclusion of a route, officers transfer the collected data from their device into a computer. The transferred information automatically updates the database. Reports can be generated in seconds and offer documented proof of your guard tour activities. Reports include Daily Activity, Incidents and History reports.

BENEFITS:

- ▶ Increases productivity
- ▶ Ensures that all checkpoints are visited
- ▶ DOCUMENTS INCIDENTS IN THE FIELD
- ▶ Provides documented proof for liability

KEY FEATURES:

- ▶ Time and date stamp each activity
- ▶ Incident and discrepancy tracking
- ▶ Tamper-proof reports
- ▶ Small compact device
- ▶ Device holds up to 300 scans

Package Price: \$997.50

Package Includes:
