

PROTRAC SECURITY

PROTRAC Security is a computerized guard tour management system that eliminates paperwork and increases productivity. Officers use portable data collection devices to document all security checkpoints visited. The date, time and location of each checkpoint are recorded simply by scanning a bar code or touching a metal tag. All incidents encountered are logged instantly.

Easy To Set-up

The Security Management System is setup in an easy-to-use, easy-to-understand format. Officer information and all security checkpoints are easily and quickly entered into your computer data base.

Easy To Use

Bar codes or metal touch tags are placed at each location requiring inspection. Officers record their activities at a specific site simply by scanning the bar code or touching the metal tag at the location. Incidents are then easily documented through the use of small incident cards or hand-held devices.

Instant Report Generation

At the end of a tour or a shift, the collected data is easily transferred from the mobile device to a computer. Reports can be generated instantly.

At the conclusion of a route, officers transfer the collected data from their devices into a computer. The transferred information automatically updates your database. Reports can be generated in seconds and offer documented proof of your guard tour activities. The system generates a variety of tamper-proof reports including Daily Activity, Incident, and Impression Variance reports.

WHY USE PROTRAC SECURITY?

Features

- ▶ Time and date stamp
- ▶ Unlimited number of checkpoints
- ▶ Incident prompting
- ▶ Tamper-proof reports
- ▶ User-defined terms
- ▶ Incident and discrepancy tracking
- ▶ Location tasking
- ▶ No down time for battery charges

Benefits

- ▶ Eliminates handwritten reports
- ▶ Eliminates data entry
- ▶ Reduces clerical errors
- ▶ Increases productivity
- ▶ Ensures that all checkpoints are visited
- ▶ Documents incidents in the field

Applications

- ▶ Amusement Parks
- ▶ Correctional Facilities
- ▶ Healthcare Facilities
- ▶ Hotels
- ▶ Manufacturing
- ▶ Resorts
- ▶ Transportation
- ▶ Utilities
- ▶ Universities
- ▶ Warehouses
- ▶ Zoos

BRADY
WHEN PERFORMANCE MATTERS MOST™

ProTouch

The ProTouch reader provides touch tag technology in a compact, portable device. It is moisture and dust resistant and easy to use. With 128K of internal memory the ProTouch will store up to 5000 tag reads before requiring a download.

Size: 5.2" x 1.6" x .08"

Weight: 5.1 oz.

PulseStar

The PulseStar is designed for the harshest environments. It's metal case is sealed against dirt and moisture. It will read up to 5400 buttons, with a battery life of up to one year.

Size: 5.12"

Weight: 3.7 oz.

LaserLite

The LaserLite reads bar codes with a laser scanner. It brings you the latest in highly functional portables. It is durable and easy to use. Each LaserLite is housed in a rocksolid, water- and dust-resistant metal case with a finish that resists corrosion.

Size: 1.47" x 1.6" x 7.18"

Weight: 11.5 oz.

LaserLite Pro

The LaserLite Pro is an exceptional high-performance data collector that offers a multitude of features. It combines laser bar code reading and Touch Memory button reading with an alphanumeric keypad. The ergonomic design provides onehanded operation for right- or left-handed users, with a direct line of sight from the display to the laser beam to the bar code.

Size: 1.75" x 2.19" x 7.61"

Weight: 13.5 oz.
