

# TOURWATCH XT

**TourWatch XT** is guard tour management system that ensures the highest level of security coverage for your facility through the use of software and hand-held computers.

Officers use the hand-held computers to document all security checkpoints visited and all incidents encountered. **TourWatch XT** helps you ensure that inspections are completed accurately and promptly. The program documents and reports problems, which leaves valuable information at your fingertips.

## KEY FEATURES:

- ▶ Time and date stamps all activities.
- ▶ Ensures that all checkpoints are visited.
- ▶ Tracks an unlimited number of checkpoints.
- ▶ Allows for directed (guided by the device) or self-directed (roam) routes.
- ▶ Ability to perform unscheduled inspections or tours.
- ▶ Displays inspection questions and/or instructions on the hand-held devices, prompting the officer through the correct steps.
- ▶ Allows responses to question in multiple choice, numeric, text entry or pick list form.
- ▶ Alerts officers to responses that are outside of acceptable parameters.

## BENEFITS:

- ▶ Improves data integrity by eliminating log sheets and manual data entry.
- ▶ Manages your security officers and provides improved security coverage
- ▶ Manages building maintenance and housekeeping quality assurance programs
- ▶ Guarantees inspections of critical items or locations by specifying must-scan checkpoints
- ▶ Maintains permanent records of security personnel and their activities
- ▶ Produces incident reports that document unusual or emergency situations
- ▶ Provides a variety of reports showing where your officers were, when they were there and their observations or actions taken.
- ▶ Standardizes procedures and data.
- ▶ Assists in providing compliance with internal regulations or external regulatory agencies such as OSHA, NFPA, JCAHO and insurance companies.
