

APPLICATION REPORT WESTERN WYOMING COMMUNITY COLLEGE

ROCK SPRINGS, WYOMING

QUOTE:

"Using PROTRAC Security has saved me approximately \$6,000 per year in damages and downtime. My security coordinator can sleep at night because he knows the job is getting done right!"

-**John Montz**, Western Wyoming Community Center
Building Operation System Specialist

SECURITY OFFICERS USE A HAND-HELD TOUCHTAG READER TO TAP DIME-SIZED METAL TAGS PLACED AT 22 CHECKPOINTS THROUGHOUT THE CAMPUS. THE DEVICE AUTOMATICALLY RECORDS THE TIME, DATE, AND LOCATION OF EACH INSPECTION.

PROFILE:

- 550,000 Square Feet
- TISCOR customer since 1998
- 22 Checkpoints
- Patrolled 24 hours a day
- 3 Security Officers

PRODUCT BENEFITS:

- PROTRAC Security provides accurate, tamper-proof electronic records detailing daily security operations. According to Mr. Montz, some employees who worked in areas such as the business office, human resources office, and computer services felt the areas weren't being inspected as thoroughly as they should. PROTRAC now gives them a record who secured what area at what time--providing undeniable proof.
- PROTRAC helps the security coordinator do his job more effectively. According to Mr. Montz, the security coordinator doesn't have to spend time answering detailed questions about security operations, because all information is printed out in accurate reports. This saves him about \$2,500 each year.
- Officers download their touch-tag readers to a PC within seconds of completing their rounds. The computer database is updated immediately afterwards, eliminating paperwork and data entry.
- PROTRAC helps Western Wyoming Community College complete other campus inspections in addition to security tours. According to Mr. Montz, the cold Wyoming winters cause a lot of damage to heating and cooling coils. Now that PROTRAC is installed, he can make sure all of the areas are checked as often as needed, saving about \$6,000 a year in damages.
- Clear, concise reports help Western Wyoming Community College analyze trends, track problems, and monitor productivity. PROTRAC also creates a permanent, historic data file that is accessible in minutes.
- PROTRAC Security ensures that every area is checked, maximizing staff productivity. Mr. Montz says PROTRAC has helped campus security become more respected, and viewed as an integral part of the system.
